

- Wide application range
- Highly accurate, long-life electrodes
- Highest standards of hygiene and safety

pH/ORP

**Low-maintenance pH electrodes and systems:
Reduce your overall process costs!**

We offer the equipment for the complete pH loop.

Transmitters

Some outstanding benefits to be gained by using METTLER TOLEDO transmitters:

- Easy to install and with user-friendly interface
- Choice of versions to satisfy most needs for system integration and implementation (2- or 4-wires)
- Different communications interface options such as HART®, FOUNDATION™ Fieldbus or PROFIBUS® PA
- Customized certificates for your process: ATEX/FM
- Sensor diagnostics and cleaning function (wash contact) available

Automated pH measurement

Some outstanding benefits of METTLER TOLEDO EasyClean systems at a glance:

- Automated procedures reduce costs surrounding maintenance of the measuring point (Cleaning and calibration)
- Regular periodic cleaning of the electrode increases its serviceable life and improves measurement accuracy
- Continuous system monitoring results in greater measurement reliability

Electrodes

Some outstanding benefits of METTLER TOLEDO pH electrodes at a glance:

- Different kinds of electrodes for highest customer satisfaction: low maintenance electrodes, compact design electrodes (PVDF body), problem solver liquid electrolyte electrodes, as well as non-glass electrodes for food applications etc.

Housings

Some outstanding benefits of METTLER TOLEDO pH housings at a glance:

- Static, retractable or flow-through housings
- Easy mounting and installation with choice of various process adaption methods
- Low maintenance effort and minimum process downtimes
- Meet strictest requirements on reliability and sterility, designed for CIP procedures (Cleaning In Place)
- Customized certificates for your process: ATEX/FM, EHEDG
- Our TriLock™ system provides protection against unintentional release of process medium

Reliable, long-lasting pH measuring equipment.

pH measurement in the biotech and pharma industries.

Chemical industry with pH measuring systems.

Pulp and paper industry with pH measuring systems.

pH measurement in the food processing industry.

METTLER TOLEDO follows in the tradition of INGOLD by continuing to provide innovative new products and systems based on decades of accumulated knowledge and experience in industrial measurement technology.

High accuracy and reliable measurement values.

The advanced technology and design of our pH electrodes and housings ensure exact and stable measurement values in every application, whether in biotechnology, the food industry or the most challenging chemical processes.

Save time and money with low-maintenance electrodes.

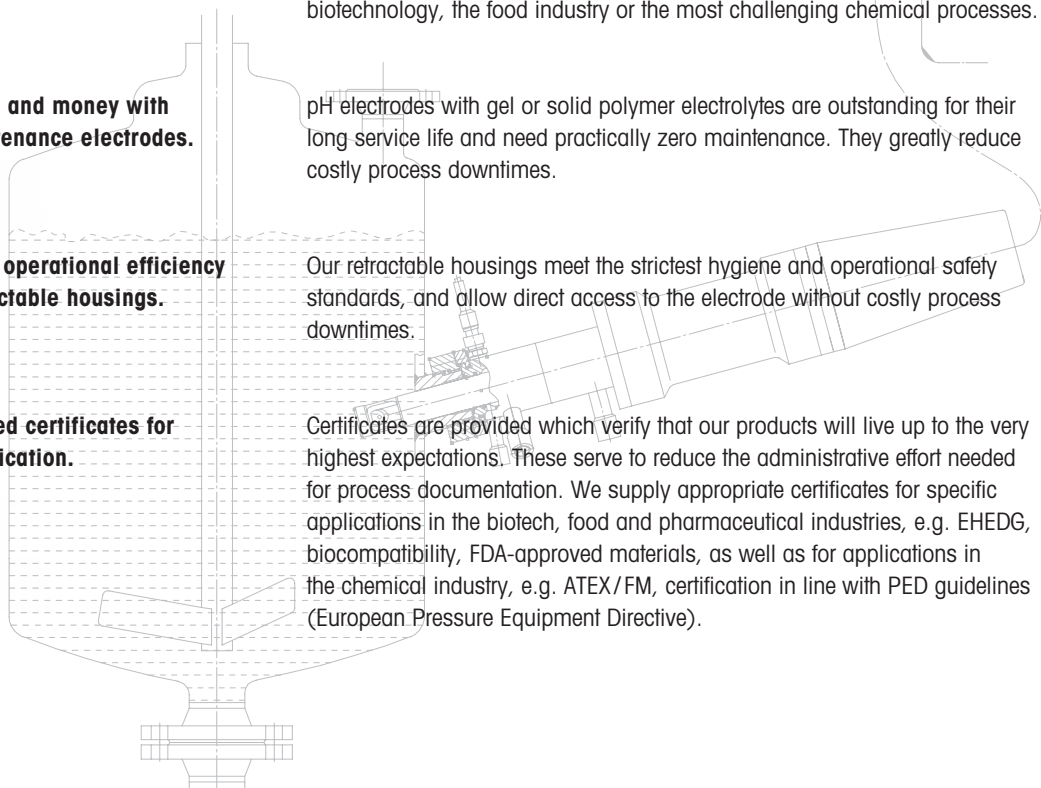

pH electrodes with gel or solid polymer electrolytes are outstanding for their long service life and need practically zero maintenance. They greatly reduce costly process downtimes.

Enhanced operational efficiency with retractable housings.

Our retractable housings meet the strictest hygiene and operational safety standards, and allow direct access to the electrode without costly process downtimes.

Customized certificates for each application.

Certificates are provided which verify that our products will live up to the very highest expectations. These serve to reduce the administrative effort needed for process documentation. We supply appropriate certificates for specific applications in the biotech, food and pharmaceutical industries, e.g. EHEDG, biocompatibility, FDA-approved materials, as well as for applications in the chemical industry, e.g. ATEX/FM, certification in line with PED guidelines (European Pressure Equipment Directive).

Biotechnology, food and pharmaceutical industries.

When measurement accuracy is vital!

A For processes operating at medium to high pressures: InPro 3030 or InPro 3100

- Specially developed for bioreactors with pressures up to 6 bar overpressure
 - No clogging of diaphragm in media containing sulfides or amino acids thanks to incorporation of our patented silver-ion trap
 - Fully autoclavable or in-situ sterilizable at temperatures of up to 140 °C
- NEW!** – Possibility to install the electrode type InPro 3100 UD in upside down position through bottom/floor of vessel.

B For processes at low to medium operating pressures: DPAS or InPro 3253

- NEW!** – The InPro 3253 incorporates a newly developed pH-sensitive glass for biotechnological applications, minimizing zero point shift following sterilization
- Highest precision at low to medium operating pressures, due to self-cleaning action at the diaphragm
- NEW!** – Designed for use at process pressures up to 4 bar overpressure (InPro 3253)
- Fully autoclavable or in-situ sterilizable (sterilization at up to 140 °C possible)
 - Greatest degree of reliability of measurement values guaranteed by the patented silver-ion trap, built-in temperature sensor and Vario Pin® (VP) connector
 - Measurement of ORP, enhanced diagnostics and shielding against earth potentials are optional extras for the InPro 3253 („Solution Ground“, InPro 3253 SG)
- MaxCert™**  – Conformance with all relevant hygiene and safety regulations confirmed through customized package of certificates (MaxCert™) for InPro 3253 electrodes

C For industrial food processing applications: InPro 3300 and LoT 406-M6-DXK

- MaxCert™**  – Elimination of risk of glass breakage through use of the glass-free pH sensor InPro 3300
- Customized package of certificates: MaxCert™ with EHEDG und 3A certificates, verification of use of FDA-compatible materials for InPro 3300
 - Rapid and reliable pH measurement in meat and dairy products with use of puncture electrode LoT 406-M6-DXK

InPro 4250 and InPro 4501 are alternatives for use in industrial wastewater. Specification: see table at top.

Chemical industry and industrial effluents.

When strong resistance to chemicals and process pressures is crucial.

D Prepressurized electrodes for accurate measurements: DPA or InPro 3250

NEW!

- Highest accuracy due to constant self-cleaning action at the diaphragm
- Designed for use at process pressures up to 4 bar overpressure (InPro 3250)
- Our patented silver-ion trap prevents any clogging of the diaphragm in media containing sulfides or amino acids
- Measurement of ORP, enhanced diagnostics and shielding against earth potentials are optional extras for the InPro 3250 („Solution Ground“, InPro 3250 SG)
- Conformance with all relative safety regulations in the chemical industry confirmed through customized package of certificates (MaxCert™) for InPro 3250 electrodes

MaxCert™

E For highly demanding chemical process applications: DXK, InPro 4250, InPro 4501 or InPro 4550

NEW!

- Solid polymer reference system to minimize effort and cost of maintenance
- Open aperture junction resistant to clogging permits measurement in highly contaminated media
- Electrodes suitable for particularly demanding chemical processes, e.g. at high operating pressures, in strongly contaminated sulfide-bearing media, or in suspensions and emulsions
- Measurement of ORP, enhanced diagnostics and shielding against earth potentials are optional extras for the InPro 4250 („Solution Ground“, InPro 4250 SG)

F The top-class electrode for especially challenging chemical processes: InPro 4800

NEW!

- Extended-life electrode reduces costs involved for maintenance and replacement
- Reliable measurement under the harshest process conditions, even at high temperatures
- The long, pressure-compensated diffusion path permits use in particularly high-pressure applications
- Enhanced diagnostics and shielding against earth potentials are optional extras („Solution Ground“, InPro 4801 SG)
- In the flat membrane version, the InPro 4801 SG is particularly resistant to wear and tear in abrasive media
- Enhanced measurement accuracy due to the built-in temperature sensor and Vario Pin® (VP) connector
- Measurement of ORP, enhanced diagnostics and shielding against earth potentials are optional extras for the InPro 4800 („Solution Ground“, InPro 4800SG)

In addition, InPro 3250, InPro 4250 and InPro 4800 electrodes fulfill all safety regulations relative to hazardous areas (ATEX, FM), and are certified in line with the European Pressure Equipment Directive guidelines (PED).

Our Service: professional and customer-oriented.

METTLER TOLEDO offers a wide range of technological measurement solutions for the area of industrial Process Analytics:

- A complete range of electrodes/sensors for pH/ORP, DO, conductivity, CO₂, and turbidity measurements
- A wide variety of static and retractable housings, cables and dedicated accessories as well auxiliary systems such as automatic sensor cleaning and calibration devices
- We have a comprehensive line of transmitters to meet your most demanding requirements, including compatibility with sophisticated, modern communication and automation systems

ServiceXXL
Tailored Services

Professional service and support is always close at hand.

Our professional worldwide distribution and service network provides you with the best possible technical and application support, ranging from consulting through to trouble-shooting.
